

Test and Travel

Are you travelling?

Do you need a PCR test for your trip?

You can easily, quickly and safely get tested at Pentabase if you are going to travel.

We have helped and ensured safer travels for thousands of passengers with a PCR test, in collaboration with some of the largest travel companies. You do not need to have a Danish CPR number to get a test performed at Pentabase.

What tests does PentaBase perform?

At PentaBase, you can have both an RT-qPCR test and an antibody test performed.

PCR-test: A test that detects if you have COVID-19 in real-time. It is available with a response time of 2 hours.

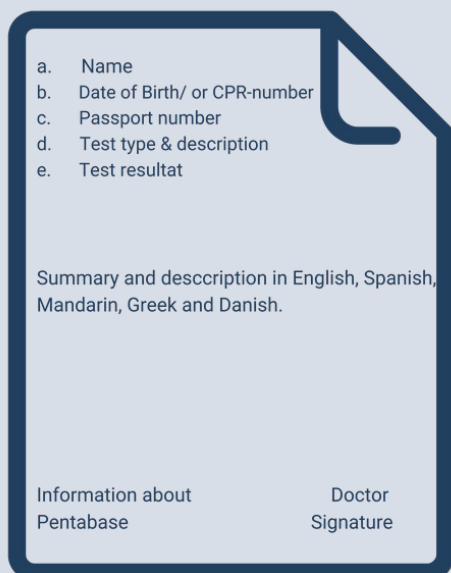

Antibody test: An ELISA test is performed by drawing a venous blood sample that can be used either to detect antibodies for the IgG or IgM. Our Elisa IgM antibody test can detect antibodies in the blood, which determine current or incipient antibodies against COVID-19. Our Elisa IgG test can help you to understand your immunity from you SARS-CoV-2 vaccination.

Book your test her: <https://pentabase.com/book/>

Travel certificate

You will receive a certificate automatically, which can be used for travels when tested at Pentabase. You will receive an SMS and e-mail with a link to your certificate. You must log in through the link to gain access, after which the certificate can be downloaded as a PDF file and/or printed.

The certificate is in English and contains the following information;

ATTENTION!

It is your own responsibility to get updated on the requirements and demands for your travel destination. We do not know for sure whether individual countries require additional forms of documentation concerning entry and exit. We do not provide specific guidance about countries and destinations..

Test og Flyv

Skal du ud at rejse?

Har du brug for en PCR-test i forbindelse med din rejse?

Hvis du skal ud at rejse, kan du nemt, hurtigt og sikkert blive testet hos PentaBase.

Vi har i samarbejde med flere af de største rejseselskaber været med til at sende tusindvis af passagerer ud at flyve. Du behøver ikke at have et dansk CPR-nummer for at få foretaget en test hos PentaBase.

Hvilke tests foretager PentaBase?

Hos PentaBase kan du både få foretaget en RT-qPCR-test og en antistoftest.

PCR-test: En test der detekterer, om du har COVID-19 nu og her. Den kan fås med en svartid på 2 timer.

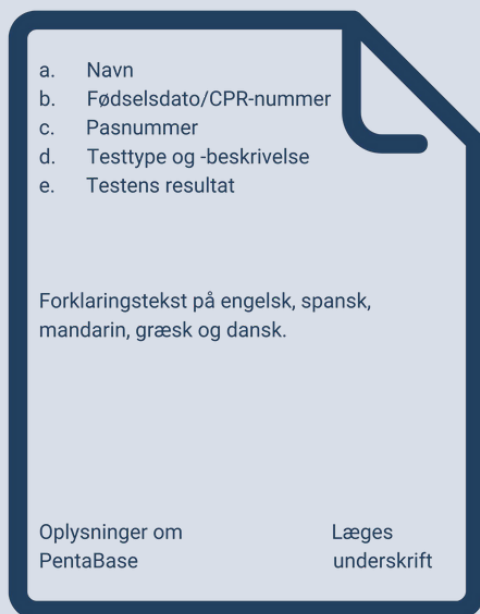

Antistoftest: En ELISA-test der foretages med blod fra vene, som kan detektere, om du har dannet antistoffer mod COVID-19.

Book tid til test her: <https://pentabase.com/book/>

Rejsecertifikat

Når du bliver testet hos PentaBase, får du automatisk et certifikat, som kan bruges til at rejse med. Du modtager svar på SMS og e-mail med et link til dit certifikat. Du skal logge ind via linket for at få adgang, hvorefter certifikatet kan downloades som en PDF fil og/eller printes.

Certifikatet er på engelsk og indeholder følgende informationer:

VIGTIGT!

Det er dit eget ansvar at tjekke op på, hvilke krav din rejsedestination eller dit rejsebureau pålægger dig. Vi kan ikke med sikkerhed vide, om enkelte lande kræver yderligere former for dokumentation i relation til ind- og udrejse. Vi vejleder desuden ikke specifikt i forhold til lande og destinationer.
